The Orion P6.6 Outdoor Rigel Series is engineered for reliable outdoor performance, combining durability, clarity, and safety in a refined design. Equipped with Nationstar LED chips and encapsulation, the display delivers high brightness and contrast, ideal for outdoor environments. The use of advanced surface mount technology enables precise control over solder paste application, with automated rejection of flawed prints to ensure a higher yield rate during production. The system uses high-quality 4-layer PCBs that are heat-treated for at least 24 hours before SMD LED installation, enhancing product longevity and reliability. It also features premium color-coded cables and a built-in fuse in each cabinet to support safe installation and maintenance.
